

PARASOUND NEW CLASSIC

2007 Product Line

Audio equipment used by movie and recording studios has to reproduce sound flawlessly, day in and day out. That's why Pixar, Universal Pictures, 20th Century Fox, Warner Brothers, Sony Pictures, Skywalker Sound and Lucasfilm all depend on Parasound. Screen credits in *Star Wars Episodes I, II* and *III* were given to one audio company—Parasound.

You don't have to be a recording engineer to appreciate Parasound. Since 1981, we've been recognized by reviewers and consumers alike as the company that combines the highest quality performance with unparalleled value.

MODEL D 200

Universal Disc Player

“If I had to sum up my experience with the NewClassic line of equipment in one word, it would be *performance*, better yet, perhaps *jaw-dropping performance* (one word wasn’t enough).”

—*Secrets of Home Theater & High Fidelity*

The Model D 200 Universal DVD Player brings you uncompromised audio performance and vividly-detailed pictures, with colors that are rich and vibrant. Be prepared to enjoy sound and picture quality that you never imagined possible with your present CDs, DVDs and MP3s.

Model D 200 Features and Specifications

- HDMI digital output, fully HDCP-compliant
- Faroudja DCDi de-interlacing, scan rates 480p/720p/1080i
- DVD-A and multi-channel SACD, with bass management
- SACD goes directly to audio DACs as a DSD bit stream
- 192 kHz / 24-bit Burr-Brown audio DACs
- 216 MHz / 12 bit precision Analog Devices video DAC
- 7.5 IRE / 0 IRE black level adjust for pure black with any TV
- MP-3, DVDR/RW, CD-R/RW compatible, JPEG, WMA, Kodak Picture CD playback
- 2-way RS-232 control, discrete IR codes, external remote in/loop out jacks
- 3 rack space chassis; RMK33 rack mount kit available

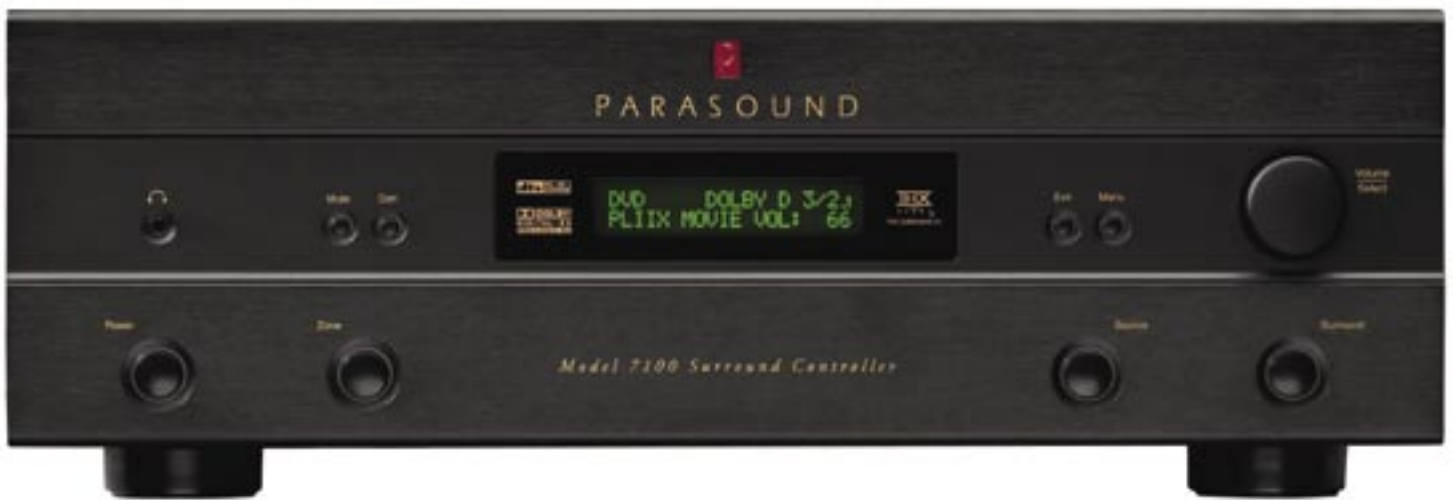

MODEL 7100

7.1 Channel Surround Controller

“The Model 7100 and Model 5250 are clearly worthy successors to the Parasound tradition of excellent sound at an excellent price. This is a potent combination of performance, features and value...”

—Home Theater

The Model 7100 Surround Controller creates an experience that surpasses the capabilities of even the finest A/V receivers. We've organized its functions so it's easy to set up and even easier to use. Here's the ultimate way to enjoy music and movies in your home.

Model 7100 Features and Specifications

- Dolby Digital EX, DTS ES96, Dolby ProLogic IIx Surround
- THX Ultra2 certified with THX Surround EX
- Up-conversion from composite & S-video to component video
- Selects 10 audio & video sources, 3 high-def component video
- 7.1 channel analog input with analog bass management
- 5 presets for audio lipsync delay, tone settings, channel levels
- Optional HDMI switching (with Parasound Zcustom model Zhd)
- 2-way RS-232; 3 12v triggers, 2 are programmable
- Discrete IR codes, external remote in/loop out jacks
- 3 rack space chassis; RMK33 rack mount kit available

MODEL 5250

Five Channel Power Amplifier

“Smooth, natural sound coupled with plenty of punch.

...The Model 5250 offers serious bang for the buck.”

—Home Theater

Parasound power amplifiers have always been noted for their extended bass and seemingly unlimited power reserves. Whether you use the Model 5250 with the Model 7100 or with your present A/V receiver, it is the ultimate powerhouse, whose high current delivery assures absolutely effortless sound reproduction.

Model 5250 Specifications

- Continuous power, 20 Hz – 20 kHz, all channels driven:
 - 250 watts RMS x 5, 8 ohms
 - 385 watts RMS x 5, 4 ohms
- Current capacity: 45 amperes peak per channel
- THX Ultra2 certified
- 4u chassis; RMK44 rack mount kit available

MODEL 5125

Five Channel Power Amplifier

NewClassic Models 5250 and 5125 share the same great features:

- Auto turn-on with 12v and audio triggers
- 12v trigger with in/loop out jacks
- Audio trigger sensitivity is adjustable
- Selecting auto turn-on overrides front panel power button
- Discrete class AB circuit, efficient low-heat design
- Gold-plated heavy-duty RCA jacks & 5-way speaker terminals
- 2 high-capacity toroid power transformers
- Ground lift switch, rear carry handles

The Model 5125 is a lower power version of the Model 5250, yet its high-current design still delivers more real-world power than a so-called "1000 watt" A/V receiver. With a Parasound power amplifier your money goes a long way because your speakers sound like larger, more expensive models.

Model 5125 Specifications

- Continuous power, 20 Hz – 20 kHz, all channels driven:
 - 125 watts RMS x 5, 8 ohms
 - 185 watts RMS x 5, 4 ohms
- Current capacity: 35 amperes peak per channel
- THX Ultra2 certified
- 3u chassis; RMK33 rack mount kit available

MODEL 2250

Two Channel Power Amplifier

The Model 2250 is an ultra-high powered amplifier that is also designed for system integration, with a host of useful features and the ability to drive speakers throughout your house with power to spare. A perfect companion to the Model 5250 in a 7.1 channel system.

Model 2250 Specifications

- Continuous power, 20 Hz – 20 kHz, both channels driven:
 - 250 watts RMS × 2, 8 ohms
 - 400 watts RMS × 2, 4 ohms
 - 385 watts RMS × 2, 2 ohms
 - 700 watts RMS × 1, 8 ohms or 4 ohms

- Current capacity: 45 amperes peak per channel
- THX Ultra2 certified
- 3u chassis; RMK33 rack mount kit available

For more Model 2250 information & its owner's manual, please visit www.parasound.com.

NewClassic two channel amplifiers are designed for no-compromise two channel systems and for 7.1 channel surround when accompanied by one of our five channel power amplifiers. These are the only power amps that are rated for continuous operation with 2 ohm loads and their low-heat design makes them ideal in custom installations where other power amplifiers would overheat.

Models 2250, 2125 & 275 have identical connectors, controls & features:

- Auto turn-on with 12 v and audio triggers
- 12 v trigger with in/loop out jacks
- Audio trigger sensitivity is adjustable
- Selecting auto turn-on overrides front panel power button
- Load impedance selector for 2 ohm loads and low heat
- Mono bridging switch, can drive two mono speakers
- 2 pairs of gold-plated 5-way speaker terminals
- Front panel A & B speaker switches, relay-controlled
- 18 dB/octave high pass filter; switchable 20 Hz /40 Hz
- Ground lift switch; L, R level controls on rear panel
- Loop out jacks for daisy-chain connections
- Discrete class AB circuit, high-capacity toroid transformer

MODEL 2125

Two Channel Power Amplifier

“I am extremely pleased that they have once again proven that quality products can be had for much less than a king’s ransom.”

—Home Theater Spot

The Model 2125 provides the right combination of power and technology to satisfy the most serious listener. Its back panel layout and special features are the same as the Model 2250. A perfect companion to the Model 5125 in a 7.1 channel system.

Model 2125 Specifications

- Continuous power, 20 Hz – 20 kHz, both channels driven:
 - 125 watts RMS x 2, 8 ohms
 - 200 watts RMS x 2, 4 ohms
 - 200 watts RMS x 2, 2 ohms
 - 400 watts RMS x 1, 8 ohms or 4 ohms

- Current capacity: 35 amperes peak per channel
- THX Ultra2 certified
- 2u chassis; RMK22 rack mount kit available

For more Model 2125 information & its owner's manual, please visit www.parasound.com.

MODEL 275

Two Channel Power Amplifier

“Parasound is an awesome company.”

—The Audiophile Voice

The Model 275 is everything a great power amplifier should be, except large. It includes all of the same technology, connectivity and features as our larger two channel models. It sounds gorgeous because it employs the same class AB circuitry. Its power output is prodigious, with a toroid power transformer that occupies nearly half of its chassis.

Model 275 Specifications

- Continuous power, 20 Hz – 20 kHz, both channels driven:
 - 75 watts RMS x 2, 8 ohms
 - 125 watts RMS x 2, 4 ohms
 - 125 watts RMS x 2, 2 ohms
 - 200 watts RMS x 1, 8 ohms or 4 ohms
- Current capacity: 30 amperes peak per channel
- 1u chassis; RMK1 I rack mount kit available

Model 275 Back Panel (shown actual size)

MODEL 2100

Two Channel Preamplifier

The Model 2100 is a versatile two channel preamplifier which is equally competent with venerable and modern technology, from vinyl to MP3. A low-noise phono input provides the correct gain and load for both MM and MC cartridges. The Model 2100 even increases level automatically whenever you plug your portable MP3 player into the front panel jack to make sure it plays at the same volume as your other sources. It also enables you to upgrade your present surround sound system for serious two channel listening.

L, R and sub bypass jacks make it simple to use the Model 2100 and your surround sound receiver in the same system, even if your system has a subwoofer and small L and R speakers. An adjustable subwoofer crossover provides analog bass management for your stereo sources, and you can adjust the subwoofer level on the front panel.

Model 2100 Features and Specifications

- 7 line-level source inputs; 1 input switchable to MM/MC phono
- Front panel input jack for portable MP3 players, auto gain offset
- 2 sub out jacks with level control, 20 Hz – 140 Hz crossover adjust
- L, R & Sub pass-through jacks, integrates into a surround system
- Remote control includes tone control bypass
- 12 volt trigger in/out jacks, 3 auto turn-on modes
- 2-way RS-232 control, discrete IR codes, external remote IR in/loop jacks
- 2u chassis; RMK22 rack mount kit available
